Re: Software Developer

Dear Mr. Smith:

I am writing in response to the job ad on Glassdoor that your company has posted in regards to the personal Software Developer position.

If you are seeking to reinforce your team with an enthusiastic, efficient and creative software developer, my enclosed resume will be of interest. You will find a brief of web and mobile development experience and skills required for a fast-paced team environment.

My successful career features key achievements such as:

- Javascript, SQL and Java programming, advanced web technologies and mobile web development.
- Microsoft network security Administrator Certificate. Windows Server 2008, Windows 7, and VMware implementation.
- 15 years of experience as a flight attendant including short, medium and long -haul flights to Europe, South America, North America and the Caribbean.
- Inflight trainer and flight attendant recruiter. Approximately 4000 people a year.

My success in these areas covers multiple environments and I am confident I can do the same as a member of your team.

I would welcome an opportunity for an interview to discuss your organization's needs and the results you can expect from me in addressing them. I can be reached at 819 5932720 to arrange a meeting at your convenience.

Kind regards,

Rafael Suarez

Encl.
